CONTENTS

No. 1, February 1985

PAGE

M. E. Feder & W. M. Burggren. Cutaneous gas exchange in vertebrates: design, patterns, control and implications 1

D. R. Walters. Shoot-root interrelationships: the effect of obligately biotrophic fungal pathogens 47

P. Knoppien. Rare male mating advantage: a review 81

Forthcoming Reviews 119

———o———

No. 2, May 1985

R. J. Bagshaw. Evolution of cardiovascular baroreceptor control . . . 121

R. B. Aiken. Sound production by aquatic insects 163

W. N. Holmes & J. C. Phillips. The avian salt gland 213

J. Moore & R. Gibson. The evolution and comparative physiology of terrestrial and freshwater nemerteans 257

Forthcoming Reviews 313

———o———

No. 3, August 1985

G. Sarmiento, G. Goldstein & F. Meinzer. Adaptive strategies of woody species in tropical savannas 315

A. S. Basra & C. P. Malik. Non-photosynthetic fixation of carbon dioxide and possible biological roles in higher plants 357

D. J. Prior. Water regulatory behaviour in terrestrial gastropods . . . 403

P. Greenaway. Calcium balance and moulting in the crustacea . . . 425

———o———

No. 4, November 1985

A. Hoffman. Island biogeography and paleobiology: in search for evolutionary equilibria 455

M. Durliat. Clotting processes in crustacea decapoda 473

N. F. Gray. Heterotrophic slimes in flowing waters. 499

Forthcoming Review 549

INDEX OF AUTHORS

	PAGE
AIKEN, R. B. Sound production by aquatic insects	163
BAGSHAW, R. J. Evolution of cardiovascular baroreceptor control	121
BASRA, A. S. & MALIK, C. P. Non-photosynthetic fixation of carbon dioxide and possible biological roles in higher plants	357
DURLIAT, M. Clotting processes in crustacea decapoda	473
FEDER, M. E. & BURGGREN, W. M. Cutaneous gas exchange in vertebrates: design, patterns, control and implications	1
GRAY, N. F. Heterotrophic slimes in flowing waters.	499
GREENAWAY, P. Calcium balance and moulting in the crustacea	425
HOFFMAN, A. Island biogeography and paleobiology: in search for evolutionary equilibria	455
HOLMES, W. N. & PHILLIPS, J. G. The avian salt gland	213
KNOPPIEN, P. Rare male mating advantage: a review	81
MOORE, J. & GIBSON, R. The evolution and comparative physiology of terrestrial and freshwater nemerteans	257
PRIOR, D. J. Water regulatory behaviour in terrestrial gastropods	403
SARMIENTO, G. GOLDSTEIN, G. & MEINZER, F. Adaptive strategies of woody species in tropical savannas	315
WALTERS, D. R. Shoot-root interrelationships: the effect of obligately biotrophic fungal pathogens	47

EDITORIAL COMMITTEE

M. Ashburner (Genetics)

B. A. Callingham (Pharmacology)

J. T. Fitzsimons (Physiology)

D. S. Ingram (Plant Pathology & Mycology)

K. A. Joysey (Zoology)

N. J. Mackintosh (Experimental Psychology)

M. A. Message (Anatomy)

D. S. Secher (Molecular Biology)

C. J. R. Thorne (Biochemistry)

R. G. West (Botany)
